Volume Contents

Volume 12 Number 1

P. J. Rabier and J. T. Oden	1	Solution to Signorini-like contact problems through interface models—II. Existence and uniqueness theorems
P. C. Fife and Ling Hsiao	19	The generation and propagation of internal layers
A. Valli and W. M. Zajaczkowski	43	About the motion of nonhomogeneous ideal incompressible fluids
Shui-Nee Chow and R. Lauterbach	51	A bifurcation theorem for critical points of variational problems
M. Fabian	63	On classes of subdifferentiability spaces of Ioffe
M. Crouzeix and G. Raugel	75	Invariance under the dihedral group and application to bifurcation problems
Software Survey Section	I	

Volume 12 Number 2

U. Łędzewicz-Kowalewska	101	Application of some specification of the Dubovitskii–Milyutin method to problems of optimal control
R. P. Gilbert and R. Magnanini	109	A moving boundary problem associated with flow through a porous medium
H. Ishii	121	Representation of solutions of Hamilton–Jacobi equations
I. U. Bronštein and A. Ya. Kopanskiĭ	147	Chain recurrence in dynamical systems without uniqueness
Je. I. Berezhnoj and P. P. Zabrejko	155	Some interpolation theory for nonlinear operators
P. M. Fitzpatrick	171	Homotopy, linearization, and bifurcation
V. Seppälä	185	On nonlinear calculus in normed linear spaces endowed with an additional binary operation
V. Coti Zelati	209	Dynamical systems with effective-like potentials
Software Survey Section	I	

Volume 12 Number 3

K. Deimling	223	Positive fixed points of weakly inward maps
K. Deimling and Hu Shou Chuan	227	Fixed points of weakly inward maps in conical shells
P. Talaga	231	The Hukuhara–Kneser property for quasilinear parabolic equations
Y. V. Venkatesh	247	Converse Hölder inequality and the L_p-instability of nonlinear time-varying feedback systems
C. Greco	259	Periodic solutions of a class of singular Hamiltonian systems
C. Cosner	271	Bifurcation from higher eigenvalues in nonlinear elliptic equations: continua that meet infinity
E. Feireisl	279	Time periodic solutions to a semilinear beam equation
G. Francsics	291	The porous medium equation: the superslow diffusion case
T. Yoneyama and J. Sugie	303	Perturbing uniformly stable nonlinear scalar delay-differential equations
Nakao Hayashi	313	Asymptotic behavior of solutions to time-dependent Hartree equations
Software Survey Section	I	

Volume 12 Number 4

G. H. Pimbley	321	A semigroup associated with a quasi-linear system in which the coupling terms are linear—II
R. Švarc	341	Operators with jumping nonlinearities and combinatorics
J. Jones, Jr and T. Mazumdar	365	On zeros of solutions of certain Emden–Fowler like differential equations in Hilbert space
S. Aniţa	375	Approximating linear optimal control problems via Trotter formula
F. A. Mohamed	389	Two-phase nonlinear free boundary problems for parabolic equations
M. Nakao	409	Decay and periodic solution for semilinear parabolic equations with a noninvertible linear operator
E. Deumens and H. Warchall	419	Explicit construction of all spherically symmetric solitary waves for a nonlinear wave equation in multiple dimensions
Software Survey Section	I	

Volume 12 Number 5

V. LAKSHMIKANTHAM	449	*Nonlinear Analysis* and Robert Maxwell
R. PINSKY	451	The dead core for reaction–diffusion equations with convection and its connection with the first exit time of the related Markov diffusion process
S. RIONERO and G. MULONE	473	Existence and uniqueness theorems for a steady thermodiffusive mixture in a mixed problem
A. W. LEUNG and ZHIMING ZHOU	495	Global stability for large systems of Volterra–Lotka type integrodifferential population delay equations
C. V. COFFMAN	507	Lyusternik–Schnirelman theory: complementary principles and the Morse index
G. AUCHMUTY	531	Variational principles for operator equations and initial value problems
SOFTWARE SURVEY SECTION	I	

Volume 12 Number 6

K. SCHILLING	565	Constructive proofs of fixed point theorems for set valued operators by simplicial algorithms
DANG DINH ANG and A. PHAM NGOC DINH	581	Mixed problem for some semi-linear wave equation with a nonhomogeneous condition
J. WARGA	593	Homeomorphisms and local C^1 approximations
R. KALABA and L. TESFATSION	599	Exact sequential filtering, smoothing and prediction for nonlinear systems
D. J. WOLLKIND and B. ZHANG	617	A nonlinear stability analysis of a model equation for alloy solidification—II
G. BEER	647	On a generic optimization theorem of Petar Kenderov
SOFTWARE SURVEY SECTION	I	

Volume 12 Number 7

D. LUPO, S. SOLIMINI and P. N. SRIKANTH	657	Multiplicity results for an ODE problem with even nonlinearity
J. M. DE GRAAF and L. A. PELETIER	675	Stimulated facilitated diffusion
M. CHIPOT	699	On the Reynolds lubrication equation
W. A. KIRK and C. M. YANEZ	719	Nonexpansive and locally nonexpansive mappings in product spaces
B. D. CALVERT and A. G. KARTSATOS	727	On the convexity of the interior of the domain of an M-accretive operator in a Banach space
S. ELAYDI and S. K. KAUL	733	Semiflows with global extensions—II. Notions of negative stability
CORRIGENDUM	747	
SOFTWARE SURVEY SECTION	I	TAG Software Development System

Volume 12 Number 8

S. W. WEI	749	Plateau's problem in symmetric spaces
A. C. LAZER and S. SOLIMINI	761	Nontrivial solutions of operator equations and Morse indices of critical points of min–max type
J. BANAŚ	777	On the superposition operator and integrable solutions of some functional equations
E. G. YANIK and G. FAIRWEATHER	785	Finite element methods for parabolic and hyperbolic partial integro-differential equations
G. J. FIX and J. T. LIN	811	Numerical simulations of nonlinear phase transitions—I. The isotropic case
ADDENDUM	825	
SOFTWARE SURVEY SECTION	I	ChemText
	II	GRANT TRACKER™
	III	CTMS

Volume 12 Number 9

R. S. Cantrell and C. Cosner	827	On the convex case in the positone problem for elliptic systems
L. E. Bobisud, D. O'Regan and W. D. Royalty	855	Solvability of some nonlinear boundary value problems
G. Citti	871	Existence of infinitely many solutions for a quasilinear degenerate elliptic equation in $\mathbb{R}^n$
S. R. Bernfeld, L. Salvadori and F. Visentin	881	Discrete dynamical systems and bifurcation for periodic differential equations
H. Amann	895	Dynamic theory of quasilinear parabolic equations—I. Abstract evolution equations
A. Damlamian and N. Kenmochi	921	Periodicity and almost periodicity of solutions to a multiphase Stefan problem in several space variables
T. Kusano and M. Naito	935	Positive solutions of a class of nonlinear ordinary differential equations
M. Ali Khan and R. Vohra	943	Pareto optimal allocations of nonconvex economies in locally convex spaces
Shi Shuzhong	951	Nagumo type condition for partial differential inclusions
J. V. A. Gonçalves	969	A note on uniqueness of solution for a class of semilinear nonselfadjoint elliptic problems
Software Survey Section	I	

Volume 12 Number 10

A. Canino	975	Large heteroclinic orbits for some evolution equations
V. G. Angelov	989	A converse to a contraction mapping theorem in uniform spaces
E. Tarafdar and T. Husain	997	An implicit function theorem for a set of mappings and its application to nonlinear hyperbolic boundary value problems at resonance
A. Favini and P. Plazzi	1017	On some abstract degenerate problems of parabolic type—1. The linear case
J. O. C. Ezeilo and M. N. Nkashama	1029	Resonant and nonresonant oscillations for some third order nonlinear ordinary differential equations

A. C. BRYAN	1047	On representations of the multisoliton solutions of the sine-Gordon equation
K. KOBAYASI	1053	Uniqueness of solutions of degenerate diffusion equations with measures as initial conditions
R. LIMA and R. V. MENDES	1061	Stability of invariant circles in a class of dissipative maps
B. RODRIGUES and S. SIMONS	1069	Conjugate functions and subdifferentials in nonnormed situations for operators with complete graphs
JIANCHENG YUAN	1079	Periodic solutions of a nonlinear autonomous age-dependent model of single species population dynamics
N. TANAKA	1087	On the existence of solutions for functional evolution equations
G. LUMER, R. REDHEFFER and W. WALTER	1105	Estimates for solutions of degenerate second-order differential equations and inequalities with applications to diffusion
P. E. SACKS	1123	Universal decay in nonlinear parabolic equations
SOFTWARE SURVEY SECTION	I	

Volume 12 Number 11

S. C. WELSH	1137	Global results concerning bifurcation for Fredholm maps of index zero with a transversality condition
G. KARAKOSTAS and V. A. STAIKOS	1149	μ-Like-continuous operators and some oscillation results. In memory of D. A. Kappos
P. DIAMOND	1167	Bifurcations of Banach space operators
P. DRÁBEK and M. KUČERA	1173	Reaction–diffusion systems: destabilizing effect of unilateral conditions
N. KATO	1193	Unbounded behavior and convergence of solutions of nonlinear Volterra equations in Banach spaces
G. M. LIEBERMAN	1203	Boundary regularity for solutions of degenerate elliptic equations
G. METZEN	1221	A semilinear problem with jumping nonlinearities in unbounded domains
D. WARD	1231	Which subgradients have sum formulas?
P. LINDQVIST	1245	Regularity for the gradient of the solution to a nonlinear obstacle problem with degenerate ellipticity
C. S. COLEMAN	1257	Dynamical equivalence and unbounded polynomial differential systems

T. H. Otway	1263	A Liouville theorem for certain nonstationary maps
N. Hirano, K. Kido and W. Takahashi	1269	Nonexpansive retractions and nonlinear ergodic theorems in Banach spaces
J. Tsinias	1283	Stabilization of affine in control nonlinear systems
Xi-Ping Zhu	1297	Multiple entire solutions of a semilinear elliptic equation
Software Survey Section	I	

Volume 12 Number 12

A. Lorenzi and E. Sinestrari	1317	An inverse problem in the theory of materials with memory
Dang Dinh Hai	1337	Note on a differential equation describing the periodic motion of a satellite in its elliptical orbit
M. G. Garroni and M. A. Vivaldi	1339	Stability of free boundaries
Tsu-Fen Chen, H. A. Levine and P. E. Sacks	1349	Analysis of a convective reaction–diffusion equation
Wan Se Kim	1371	Boundary value problem for nonlinear telegraph equations with superlinear growth
C. Y. Chan and Man Kam Kwong	1377	Quenching phenomena for singular nonlinear parabolic equations
A. El Hachimi and F. De Thélin	1385	Supersolutions and stabilization of the solutions of the equation: $(\partial u/\partial t) - \operatorname{div}(\lvert\nabla u\rvert^{p-2}\nabla u) = f(x, u)$
J. Sokołowski and J. P. Zolesio	1399	Shape sensitivity analysis of contact problem with prescribed friction
D. Zagrodny	1413	Approximate mean value theorem for upper subderivatives
J. S. Treiman	1429	Shrinking generalized gradients
F. A. Howes and S. Whitaker	1451	Asymptotic stability in the presence of convection
S. Dolecki and C. Malivert	1461	Stability of efficient sets: continuity of mobile polarities
